Alignment I am in the market for a way to save data from several columns of text in a CSV file, saved as a Text File. The reason for this is, the data is saved as a CSV but it is exported to a database as an XML file and I would prefer it to be saved as a Text File. For this purpose, I am using macros in Microsoft Excel. The macros retrieve data from an Access Database and print it to the spreadsheet, using the ACCESS API in VBA. I want to save all the text columns in the spreadsheet, saved as a Text file. As my data is of several different types of data, column headers, numbers, text, dates and so on, my initial thought was to change the format of the data in the columns, so that all data in the columns would be aligned (with a different background colour, depending on the type). The

data is not currently saved as CSV, but is saved as a series of XML files. Now the problem comes with: 6d1f23a050
