Win32 Loader v2.0.4.zip.Q: How to get sessions to work in ASP.NET Core 2? I'm very new to ASP.NET Core so forgive me if this is a simple answer. I am trying to use Microsoft.Extensions.Options.OptionsService for setting my environment settings. I've got everything setup and I can see the Options are being set in my configuration. When I try to access them via Options in the Startup class (I'm using Microsoft.AspNetCore.Session), I get an error saying Access to memory is not allowed. In the .Net Core 2 docs, under the Settings section, they show a session example: public class Startup { public Startup(IConfiguration configuration) { Configuration = configuration; } public IConfiguration Configuration { get; } public void ConfigureServices(IServiceCollection services) { services.AddOptions(); // Start the app services.AddOptions(); services.AddOptions(); services.AddCors(); } public void Configure(IApplicationBuilder app, IHostingEnvironment env) { app.UseCors(builder => { builder.
